How do you plan to update the site?

- I'll hire Maestra to update my site occasionally (worry free – monthly or pay-as-you-go maintenance options)
- I plan to use WordPress to update my own site (more user-friendly than HTML editor, easier to add new pages and features)
- I plan to update my own site with an HTML editor (more complex, but cheaper initial set up than WordPress)
- I need to discuss these options to determine my needs.

Any other special notes/preferences?
